OUTLINE

- Executive Summary
- Introduction
- Methodology
- Results
 - Visualization – Charts
 - Dashboard
- Discussion
 - Findings & Implications
- Conclusion
- Appendix

EXECUTIVE SUMMARY

- Skills required in IT field are ever changing
- It is important to identify full skill requirements and trends to keep pace with changing technologies to remain competitive
- This presentation shows current and future trends in programming languages, databases, platforms and webframes.

INTRODUCTION

- This presentation was created for stakeholders and business decision makers within the IT field
- The presentation helps to identify future skill requirement in the IT field necessary for people and firms to keep pace and remain competitive
- All recommendations are based on the analysis thoroughly carried out

METHODOLOGY

- A modified subset of the Stack Overflow data was used. The dataset was wrangled, cleaned and processed to remove duplicates, fill missing values and normalized.
- Then the processed data underwent exploratory analysis in order to find the distribution of the data, correlation of different columns and identify outliers.
- The data was then used to visualize the distribution across features, the relationships between feature and the composition of the data
- Lastly, Cognos Dashboard Embedded was used to build a dashboard to visualize two files which are also part of the modified Stack Overflow subset data.

RESULTS

PROGRAMMING LANGUAGE TRENDS

Current Year

Top 10 Language Worked With

Next Year

Top 10 Language Desire Next Year

PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

Findings

- Javascript and HTML/CSS continues to be the top two most popular programming languages for this year and next
- Python and Typescript have gained more interest for next year programming aspirants
- There have been a decrease in interest for SQL and Bash/Shell/Powershell

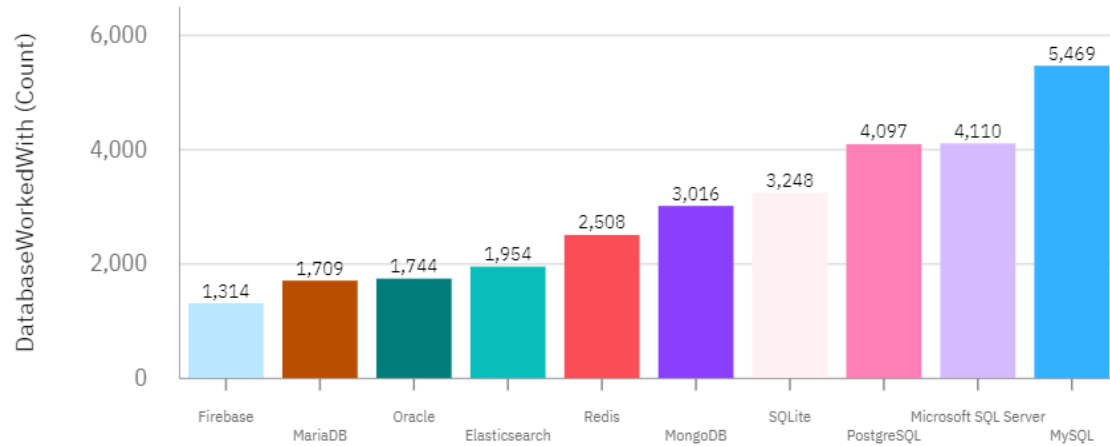

Implications

- Continue to employ similar number of people who are skilled with Javascript and HTML/CSS
- There should be an increase in the employment of people skilled with Python and Typescript
- Employ less individuals who are skilled with SQL and Bash/Shell/Powershell

DATABASE TRENDS

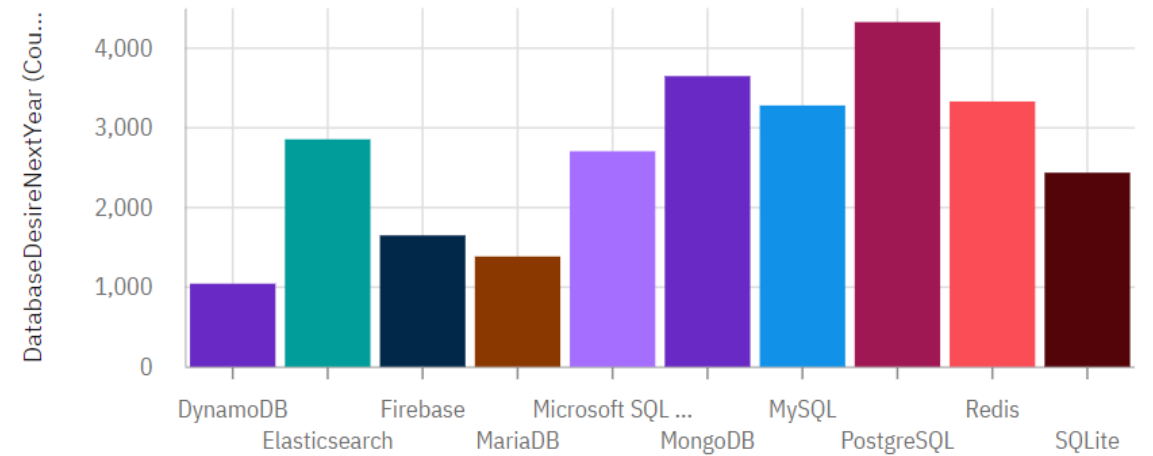

Current Year

Top 10 Database Worked With

Next Year

Top 10 DatabaseDesireNextYear

DATABASE TRENDS - FINDINGS & IMPLICATIONS

Findings

- Interest in MySQL, SQLite and Microsoft SQL Server has decreased as compared to the current year
- PostgreSQL and MongoDB has gained more relevance across database aspirants
- There is also an increase in Redis and Elasticsearch for next year

Implications

- Employ less people skilled with MySQL, SQLite and Microsoft SQL Server
- Increase the employment of people skilled with PostgreSQL and MongoDB
- Employ more people skilled with Redis and Elasticsearch

DASHBOARD

https://eu1.ca.analytics.ibm.com/bi/?perspective=dashboard&pathRef=.my_folders%2Fdashboard&action=view&mode=dashboard&subView=model000001856f9e86e7_00000000

DISCUSSION

OVERALL FINDINGS & IMPLICATIONS

Findings

- Programming Languages: Typescript and Python are gaining significant interest
- Databases: Interest in Elasticsearch, Redis, PostgreSQL and MongoDB continues to grow
- Platforms: Interest in Slack and Windows are dropping significantly
- Webframe: Vue.js and React.js are gaining substantial growth

Implications

- Continue to staff people skilled with Javascript and HTML/CSS but increase employment for Python and Typescript
- Employ more people skilled in Redis, Elasticsearch, PostgreSQL and MongoDB
- Continue to staff people skilled with Linux but increase employment for Docker, AWS and Android while you reduce recruitment for Windows and Slack
- Continue to staff those skilled in ASP.NET but employ more people skilled with Vue.js and React.js

CONCLUSION

- Create budget to hire additional staff with skills needed to fill gaps
- Set aside a budget and engage workers in programs to upskill those already employed
- Make adjustments in staffs for those whose skill is no longer in demand

APPENDIX

- Webscrapping was done using BeautifulSoup tool to extract data from a website, in order to calculate for the average salaries of developers and the resulting data saved into a CSV file
- Also, data was collect through API and extracted data saved into a CSV file
